Profile

Computer Information Systems graduate (GPA 3.67, Excellent) with hands-on experience building full-stack web applications using React, Node.js, and SQL. Completed the McKinsey Forward program, developing leadership, communication, and teamwork skills. Seeking a junior developer role to apply strong technical fundamentals and contribute to impactful projects while continuing to grow as a software engineer.

Education

Bachelor's in Computer Information Systems at Jordan University of Science and Technology, Irbid, Jordan

Grade: 3.67 (Excellent)

October 2022 - June 2026

A field that combines computer science and business concepts to design, develop, and manage information systems that support organizational operations and decision-making. The program focuses on system analysis, database management, software development, networking, and the implementation of technology solutions to solve business and computing challenges.

Skills

Programming Languages: C, C++, Java, Dart, Python

Front End: HTML, CSS, JavaScript, React JS, Flutter

Back End: Node JS, PHP, SQL, PL-SQL

Version Control Systems: Git, GitHub

Projects

Kaggle-Competition for Data Mining • [GitHub](#)

- Developed a practical data classification application using Python and machine learning.
- Generated predictions on data and exported the results.

JUST Journal – Graduation Project • [GitHub](#)

- Developed a web-based scientific journal platform managing research paper submission, peer review, and publication Languages
- Implemented role-based access control for Authors, Reviewers, and the Editorial Board with real-time manuscript status tracking.
- Built the front end in React.js, back end in Node.js, and data layer in MySQL; delivered using Scrum Agile methodology across sprints.

Languages

Arabic – Native

English – Level B1
